Marquise Preassembled Door System

Preassembled doors are completely factory assembled. The door is hung in the frame and all hardware is installed including choices in a wide variety of lever locks, panic devices, mortise locks, and closers. Lite kits are installed (with insulated or single pane glass), and a 16 gauge c-channel sub-frame system is attached (framed opening). Because it arrives to the job site as a “preassembled unit” field installation only takes around 30-45 minutes.

Features:

- 18 or 20 gauge A40 galvanized doors—polystyrene insulated core (urethane option), textured or smooth skins
- 16 gauge A40 galvanized frames—5 3/4” kerf type profile. 16 GA Subframe System. 12 GA clips
- Baked-on finish coat paint white or bronze—special colors available
- Wide variety of hardware items—from value to high end architectural
- Door system for every wall application—exterior and interior (masonry, steel/wood stud, etc.)
- 3070, 4070, and 6070 stock sizes—but any size can be manufactured in very short lead times
- Beveled door edge for tighter fit.

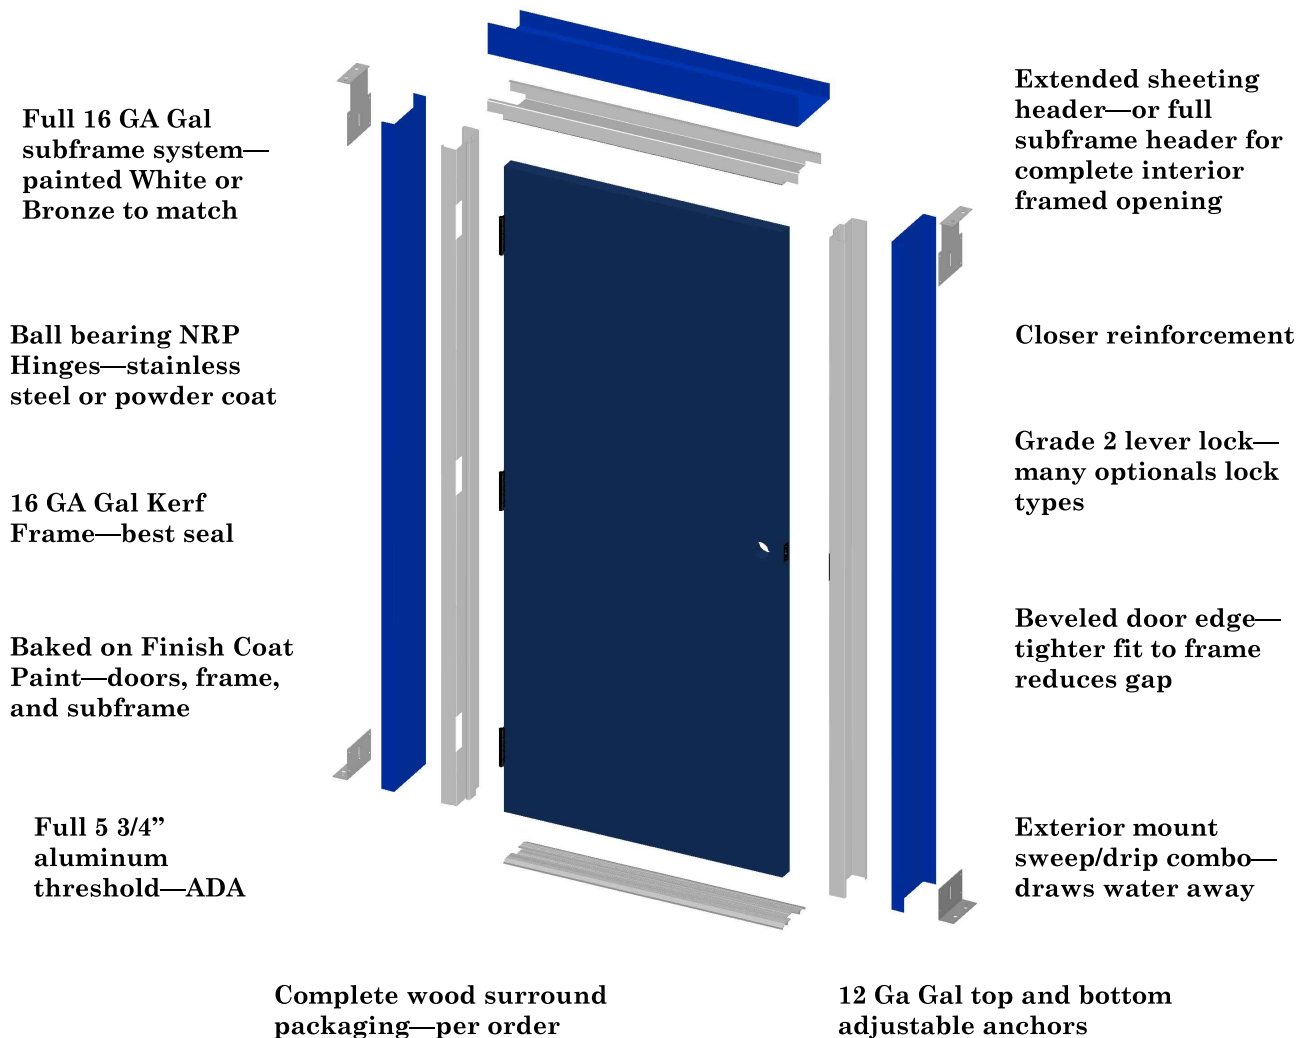

Benefits:

- Typical installation savings of 4-8 hours—depending on the type and amount of hardware options
- No potential missing components
- Hardware is installed by trained door assemblers—so everything functions correctly
- Lite kits are installed and include the glass
- Reduced call backs
- ADA compliance on standard door packages
- Large number of options & accessories
